ABOUT ME

I'm a 33 years old tech lead software engineer currently based in Berlin. I love everything that has to do with software development, architectural planning and mentoring peers. Building products with great UX is something I'm really passionate about.

WORK EXPERIENCE

JAN 2020 - Current

Senior Software Engineer
Boxplot, Berlin - DE

Building B2B applications tailored to the needs of our clients. We specialize in data mining with a focus on customer activities. My daily responsibilities consist of planning, defining and improving our architecture, writing code, reviewing pull requests and mentoring peers. Majority of my development time I spend writing React.js and Node.js code.

JAN 2019 – DEC 2020

Senior Software Engineer, Freelance
Skill Yoga, Berlin - DE

I was in charge of building the react native yoga app with React.js, Redux on top of AWS serverless API and Firebase. App is available on the app store and has currently a rating of 4.7.

FEB 2014 – DEC 2018

Tech lead, Senior software engineer
Fanmiles, Berlin - DE

Making sure the product vision was aligned with the architectural and infrastructural vision of the platform, I acted as an architect a team lead and an engineering manager with a hands-on approach.
